

Using Systematic Screening Data to Support Students within Comprehensive, Integrated, Three-tiered (CI3T) Models of Prevention

Conference on Strategies to Reduce Exclusionary School Discipline
Lincoln, Nebraska September 18, 2015

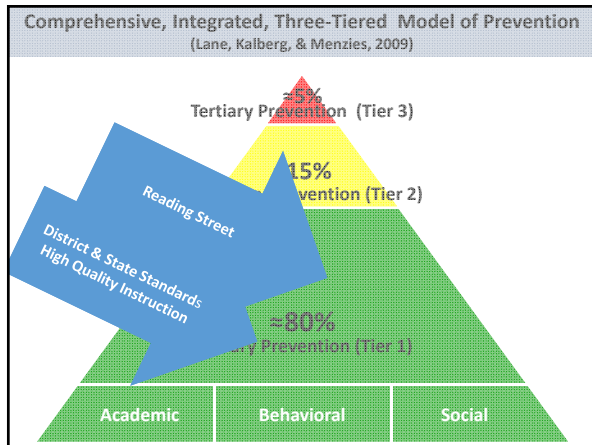

Kathleen Lynne Lane, Ph.D., BCBA-D

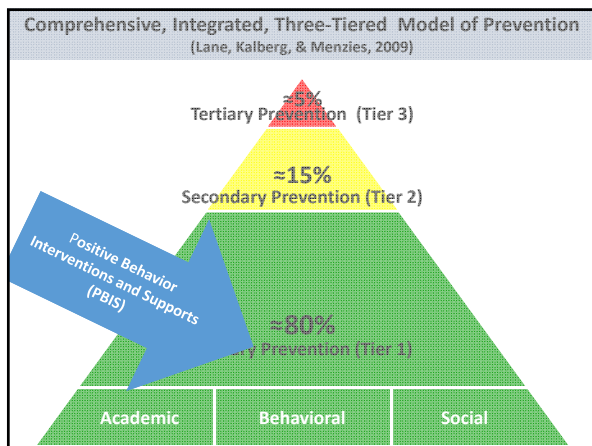

Agenda

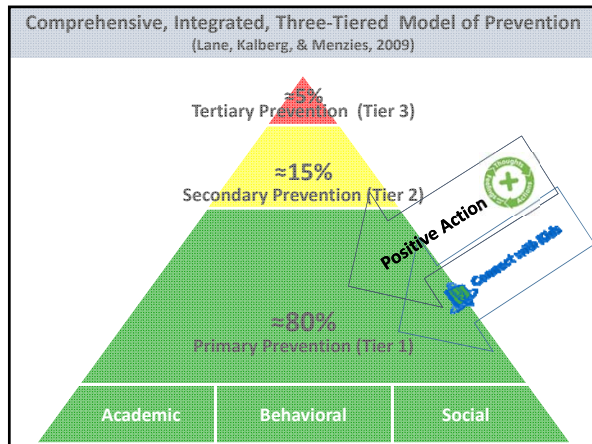

- Comprehensive, Integrated, Three-tiered (CI3T) Models of Prevention
- The Importance of Systematic Screening
- Using Screening Data ...
 - implications for primary prevention efforts
 - implications for teachers
 - implications for student-based interventions at Tier 2 and Tier 3

SYSTEMATIC SCREENING for BEHAVIOR DISORDERS

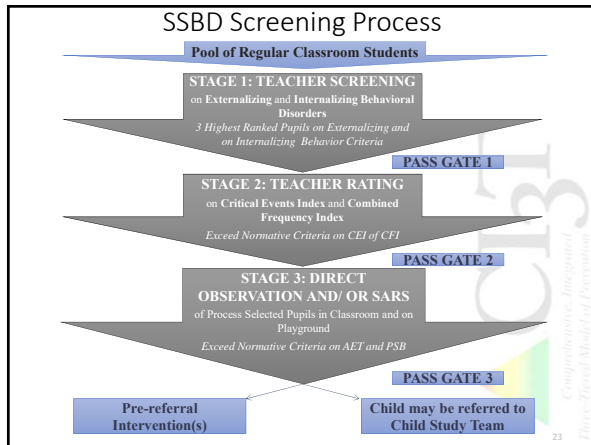

SSis Elementary Performance Screening Guide

Systematic
Screener for
Behavior Disorders

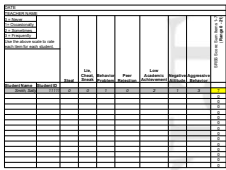

(SSBD 2nd ed.; Walker, Severson, & Feil, 2014)

Student Risk Screening Scale (SRSS)

Drummond, T. (1994). *Student Risk Screening Scale*. Grants Pass, OR: Josephine County Mental Health Program.

Student Risk Screening Scale (Drummond, 1994)

The SRSS is 7-item mass screener used to identify students who are at risk for antisocial behavior.

Uses 4-point Likert-type scale:
never = 0, *occasionally* = 1, *sometimes* = 2, *frequently* = 3

Teachers evaluate each student on the following items

- Steal
- Lie, Cheat, Sneak
- Behavior Problems
- Peer Rejection
- Low Academic Achievement
- Negative Attitude
- Aggressive Behavior

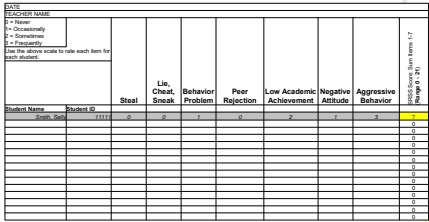

Student Risk is divided into 3 categories

Low 0 – 3
Moderate 4 – 8
High 9 - 21

(SRSS; Drummond, 1994)

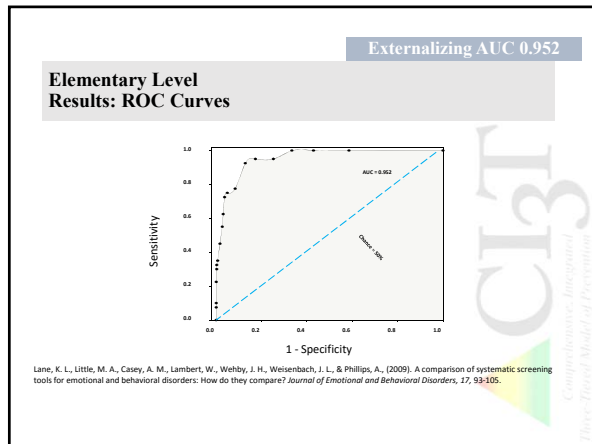

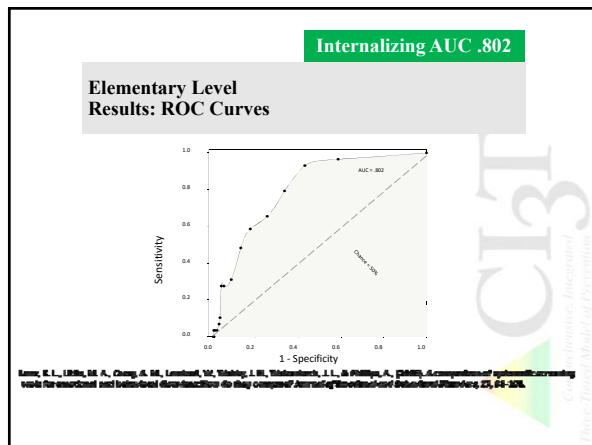

Student Risk Screening Scale (Drummond, 1994)

Student Risk Screening Scale for Early Childhood: An Initial Validation Study

Authors: Kathleen Lynne Lane, PhD, Wendy Peis Oakes, PhD, Holly Mariah Menzies, PhD, Rebecca Major, MEd, Lourie Allegra, MEd, Lisa Powers, PhD, and Chris Schatschneider, PhD

Abstract: The report details of an exploratory validation study of a revised instrument: the Student Risk Screening Scale for Early Childhood (SR2-EC). The SR2-EC was modified to reflect characteristics of attending and interacting behaviors identified by preschool-age children. In Study 1, we explored the reliability of SR2-EC Student Risk Screening Scale (SR2-EC) by comparing scores of SR2-EC, internal consistency, and factor structure using exploratory factor analysis with 400 preschool-age students. Results supported retention of 11 items, resulting in the SR2-EC 11-item SR2-EC. In subsequent studies, we explored the validity of the SR2-EC 11-item SR2-EC with two well-established screening tools: the Strengths and Difficulties Questionnaire and the Early Screening Profile. In Study 2, we reported findings of a confirmatory factor analysis and a subsequent convergent validity study with 737 preschool-age students to determine generalizability. The overall findings and future directions.

Keywords: systematic screening, interacting and attending behavior, preschool, early childhood

Introduction: Systematic screening tools for behavior are being introduced within educational systems to successfully detect and assess school readiness. While in detecting behavior, screening tools are being used to identify children with behavior problems, children with high school readiness and challenges at the early ages of school. This is especially given the behavioral challenges in the first few years of school (e.g., social, emotional, and academic) in attending and interacting behaviors (e.g., non-compliance and aggression) and include a greater percentage of children than one might expect. Prior studies estimate suggest that 20% of school-age children exhibit at least one form of behavior problem.

Conclusion: The SR2-EC 11-item SR2-EC was modified to reflect characteristics of attending and interacting behaviors identified by preschool-age children. In Study 1, we explored the reliability of SR2-EC Student Risk Screening Scale (SR2-EC) by comparing scores of SR2-EC, internal consistency, and factor structure using exploratory factor analysis with 400 preschool-age students. Results supported retention of 11 items, resulting in the SR2-EC 11-item SR2-EC. In subsequent studies, we explored the validity of the SR2-EC 11-item SR2-EC with two well-established screening tools: the Strengths and Difficulties Questionnaire and the Early Screening Profile. In Study 2, we reported findings of a confirmatory factor analysis and a subsequent convergent validity study with 737 preschool-age students to determine generalizability. The overall findings and future directions.

See Lane, Menzies, Bruhn, and Crnobaric (2011)

A Step-by-Step Process

Step 1: Construct your assessment schedule

Step 2: Identify your secondary supports

- Existing and new interventions

Step 3: Determine entry criteria

- Academic screening scores, progress data, behavior screening scores, attendance data, etc.

Step 4: Identify outcome measures

- Pre and post tests, CBM, office discipline data, GPA, etc.

Step 5: Identify exit criteria

- Reduction of discipline contacts, academic success, reduction of truancies and absences, etc.

Step 6: Consider additional needs

**Examining Academic and Behavioral Data:

Support	Description	Behavioral Data: Entry Criteria	Monitor Progress	Exit Criteria
Behavior Contract	A written agreement between two parties used to specify the contingent relationship between the completion of a behavior and access to or delivery of a specific reward. Contract may involve administrator, teacher, parent, and student.	Behavior: SRSS - mod to high risk Academic: 2 or more missing assignments with in a grading period	Work completion, or other behavior addressed in contract Treatment Integrity Social Validity	Successful Completion of behavior contract
Self-monitoring	Students will monitor and record their academic production (completion/ accuracy) and on-task behavior each day.	Students who score in the abnormal range for H and CP on the SDQ; course failure or at risk on CBM	Work completion and accuracy in the academic area of concern; passing grades Treatment	Passing grade on the report card in the academic area of concern

Lane, Kalberg, & Menzies (2009). pp. 131 - 137, Boxes 6.1 - 6.4

Small group Reading Instruction with Self-Monitoring

Lane, K.L., & Oakes, W.P. (2012). Identifying Students for Secondary and Tertiary Prevention Efforts: How do we determine which students have Tier 2 and Tier 3 needs? *In preparation*.

First Grade Students' Self Monitoring Form

Student Name: _____ Date: _____

Reading Checklist

1. Did I come to the reading table when my teacher called me?

2. Did I read my book?

3. Did I build words or practice sounds with the tiles?

4. Did I tap the letter sounds to read or spell words?

5. Did I practice trick words?

6. Did I follow my teacher's directions?

5 out of 6 = 1 PBIS ticket

Match my teacher = 1 PBIS ticket

Altmann, S. A. (2010). Project support and include: the additive benefits of self-monitoring on students' reading acquisition. Unpublished master's thesis, Vanderbilt University.

Treatment Integrity Social Validity Monitor student progress

Teacher: Ms. Hunt Date: _____ Time: _____

Item

1. Did student come to the reading table when the teacher called him?

2. Did student read his book?

3. Did student build words or practice sounds with the tiles?

4. Did student tap letter sounds to read or spell words?

5. Did student practice trick words?

6. Did student follow teacher's directions?

7. Did I prompt the student to complete the checklist after each activity?

8. Did I compare my checklist to the student's at the end of the intervention period?

9. Did I reward the student appropriately for completing the checklist and/or agreeing (i.e. give a checkmark for only fewer than 3 prompts, give a ticket for having all but one check, etc)?

David | Trevis | Teacher

Altmann, S. A. (2010). Project support and include: the additive benefits of self-monitoring on students' reading acquisition. Unpublished master's thesis, Vanderbilt University.

Support	Description	Schoolwide Data: Entry Criteria	Data to Monitor Progress:	Exit Criteria
READ 180 (Stage C) Reading Intervention	Students participate in a 50 min reading instructional block during their study hall period. Students meet in the computer lab for participation in the online portion 20 min daily. Instruction is relevant to high school students. Students use a progress management system to monitor and track their own progress. Instruction is taught by special education teachers and general education teachers with training in the READ 180 Curriculum.	(1) Students in grades 9 – 12. (2) Reading performance basic or below basic on state assessment (but above 4 th grade reading level). (3) SRSS risk scores in the moderate range (4 – 8).	<u>Student Measures:</u> Meeting individual READ 180 reading goals: (1) Progress Monitoring with Scholastic Reading Inventory (2) Writing Assessments (3) formative assessments (vocabulary, comprehension and spelling) (4) Curriculum-based Assessments (5) Attendance in class <u>Treatment Integrity:</u> Teachers monitor performance and attendance in class. Completion of weekly checklists for activities completed. <u>Social Validity:</u> Students and teachers complete surveys	Students meet instructional reading goals. SRSS score in the low risk category (0 – 3) on the next screening time point
Lane, K. L., Oakes, W. P., Menzies, H. M., Oyer, J., & Jenkins, A. (2013). Working within the context of three-tiered models of prevention: Using school wide data to identify high school students for targeted supports. <i>Journal of Applied School Psychology</i> , 29, 203-229.				

Support	Description	Schoolwide Data: Entry Criteria	Data to Monitor Progress:	Exit Criteria
Mentoring Program (Sophomores/ Juniors/ Seniors)	Focus is on academic achievement, character development, problem-solving skills, improving self-esteem, relationships with adults and peers, and school attendance. Volunteer teachers serve as mentors; meeting weekly (30 – 60 min) with students during the school day.	(1) 10th/11 th / 12 th graders (2) Behavior: SRSS: High (9-21) or Moderate (4-8) by either 2nd or 7th period teacher ODR ≥ 2 Absences ≥ 5 days in one grading period (3) Academic: GPA ≤ 2.75	<u>Student Measures:</u> (1) Increase of GPA at mid-term and semester report cards. (2) Decrease of ODR monitored weekly. (3) Reduced absences (fewer than one per quarter) <u>Treatment Integrity:</u> Mentors complete weekly mentoring checklists to report meeting time and activities. <u>Social Validity:</u> Pre and post surveys for students and mentors.	Yearlong support Students who no longer meet criteria next fall Seniors: graduation
Lane, K. L., Oakes, W. P., Menzies, H. M., Oyer, J., & Jenkins, A. (2013). Working within the context of three-tiered models of prevention: Using school wide data to identify high school students for targeted supports. <i>Journal of Applied School Psychology</i> , 29, 203-229.				

Support	Description	Schoolwide Data: Entry Criteria	Data to Monitor Progress:	Exit Criteria
Targeted Algebra II Study Hall	Direct, targeted instruction of Algebra II learning targets by math teachers. Time will be used to re-teach concepts, provide one-on-one or small group instruction and offer greater supports for students struggling to pass the graduation requirement course. 50 min per day until exit criteria is met.	(1) 12th graders (2) Algebra II grade drops below a 75 at any point in the semester (3) Have study hall time available and permission of 5th period teacher (4) Self-selecting to engage in study hall	<u>Student Measures:</u> Algebra II classroom grades Daily class average if grade is ≤ 75 <u>Treatment Integrity:</u> Daily monitoring of the lessons covered and student attendance <u>Social Validity:</u> Pre and Post Student Surveys	Algebra II Grade increases to satisfactory level (above 75%).
Lane, K. L., Oakes, W. P., Menzies, H. M., Oyer, J., & Jenkins, A. (2013). Working within the context of three-tiered models of prevention: Using school wide data to identify high school students for targeted supports. <i>Journal of Applied School Psychology</i> , 29, 203-229.				

A Step-by-Step Process

Step 1: Construct your assessment schedule

Step 2: Identify your secondary supports

- Existing and new interventions

Step 3: Determine entry criteria

- Nomination, academic failure, behavior screening scores, attendance data etc.

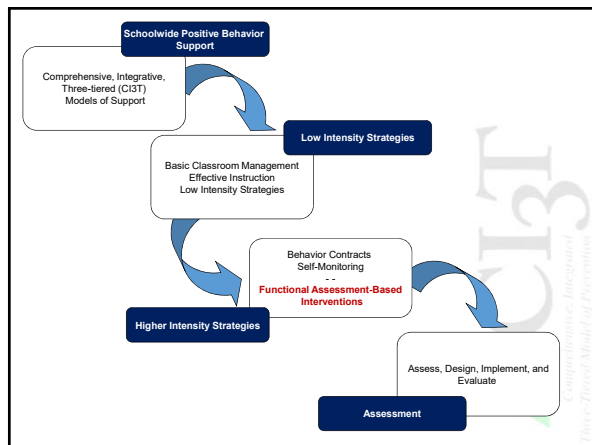

Step 4: Identify outcome measures

- Pre and post tests, CBM, office discipline data, GPA etc.

Step 5: Identify exit criteria

- Reduction of discipline contacts, academic success, reduction of truancies and absences etc.

Step 6: Consider additional needs

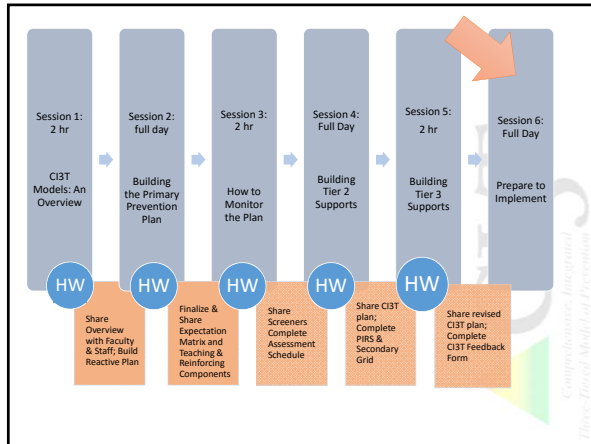

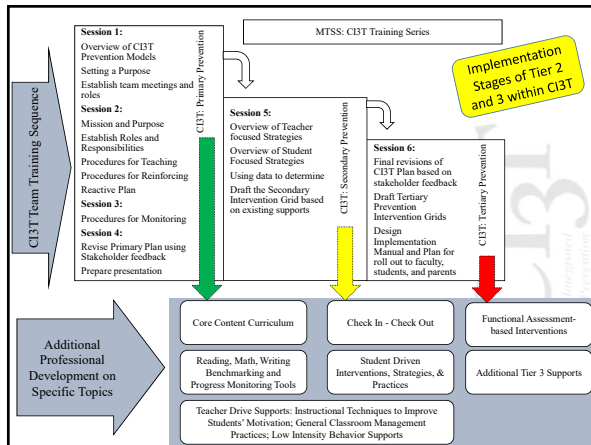

(Lane & Oakes, 2012)

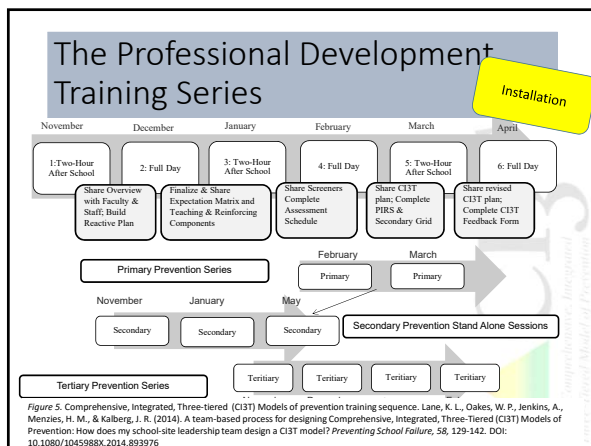

Decision Making ...

Questions to consider	SIBD	SRS	SESS-IE	SDQ	BASC [®] -RES	SSB - PDI
What are the grade levels for the measure?	K-6	K-12	K-6; 7-12	PK-12	PK-12	PK-12
What types of concerns does the measure detect?	Internalizing/Externalizing	Externalizing	Internalizing/Externalizing	Total Difficulties	Internalizing/Externalizing School Problems Adaptive Skills	Prosocial Behaviors Motivation to Learn Math Skills Reading Skills
Who may complete it?	Teacher	Teachers	Teacher	Teacher Parents Students (ages 11-17)	Teachers Parents	Teachers
Is the measure free-access?	No	Yes	Yes	Yes	No	No
How much time does the measure take?	< 1 hour per class	10-15 min per class	10-15 min per class	< 1 hour per class	5 – 10 min per student	Approximately 30 min per class
Is their online or electronic scoring options?	Yes	Yes	Yes	Yes	Yes	Yes
Is there an intervention component?	No	No	No	No	Yes	Yes
